 **TERRAM**
Geosynthetics you can trust

TERRAM products

TERRAM is the geosynthetics brand leader and has more than 45 years of experience in the industry. Our quality tests and unique manufacturing processes ensure an excellent product, every time.

Technical staff are available to answer your queries – call 01621 874 200 and ask for a technical specialist for the product or application you require.

Geotextiles

Industry-leading geotextiles for separation, filtration, reinforcement, protection and drainage in road and rail applications.

See Page 3

Geocomposites

Our geocomposites are used extensively in construction and civil engineering projects for drainage applications.

See Page 4

Geocells

Honeycomb-shaped 3D confinement systems that can be filled with soil, sand or aggregate for structural embankments, load platforms, slope erosion control or flood protection applications.

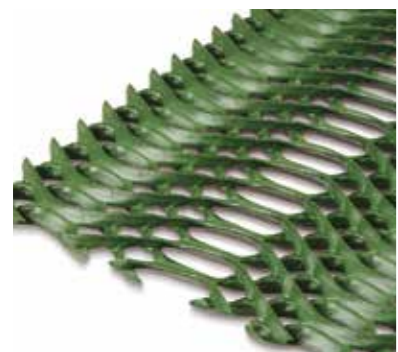

See Page 4

Rail Geosynthetics

Solutions tailored to track-bed applications, solving separation, filtration, drainage or reinforcement issues.

See Page 5

Grass Mesh

Effective reinforcement for grassed surfaces subject to pedestrian or vehicular traffic. Applications include overflow car parks and access paths.

See Page 6

Porous Paving Grids

Heavy load-bearing pavement-like gravel or grassed permeable surface for trafficked areas. Suitable for car parking, access roads, paths and use in Sustainable Urban Drainage Systems (SuDS).

See Page 7
